UX Designer II at United Wholesale Mortgage

2025 - present

Loan Origination System

Utilized Claude Code to design and build the financial section (income, assets, and liabilities) of a brand new loan origination system.

Underwriting Action Bar

Proposed, designed, and shipped an underwriting action bar to give underwriters quick access to things they may need to do at any point during their underwrite.

New Styling System for Legacy Software

Designed and gained adoption for a new styling system used across a 200 person dev team. The new system used visual design to allow for more hierarchy and scannability, helping underwriters move fast.

The Role

Industry	Mortgage Lending
Product Team	200 people
Users	Brokers & Underwriters

Design Skills Acquired

-  Bringing stakeholders along for the ride
-  Designing for efficiency and learnability
-  Increasing visibility of complex business logic

Product Designer & Front-End Developer at Yerbba

2022 - 2024

Personalized Breast Cancer Report

Redesigned and built the flagship breast cancer report to be more intuitive and discoverable. This led to a 50% conversion rate from the free preview to the paid report.

Sign Up Flow to Connect Medical Records

Redesigned and built the sign up process to make it easier for users to find and give access to their electronic medical records.

Internal System to Review AI-Generated Reports

Designed and built from scratch an internal version control system for medical records, making it more efficient to review and approve updates to the users' breast cancer reports.

The Role

Industry	Healthcare
Product Team	5 people
Users	Breast Cancer Patients

Design Skills Acquired

-  Making key features discoverable in new products
-  Zero to one product design informed by user research
-  Distilling complex information into an intuitive format
-  Gaining the trust of users who are skeptical of the industry
